THE LEADER OF THE STRIKE.

A wiry man of about 35 years, of mid-

dle height, with keen gray eyes, shat-

tered by gold eyeglasses, with black

hair, a quick, decided way of speak-

ing, and a pleasant manner, sat at a

table in a New York hotel parlor.

S. P. MAXIM & SON, Agents, South Paris,
Me. We desire to call special attention to
the superior quality of this paint. During
the past three years over one thousand
gallons of it have been used in this vicinity,
giving in every instance the very best satis-
faction.
It is well known that the
best lead and oil mixed
in the usual way, will
in a short time, lose its
gloss and rub off or chalk.
Rubber Paint is guaran-
teed not to crack, chalk,
or peel.
You are aware of great
prejudice against this
paint, but we confidently
recommend this
believing it to be the most beautiful, durable,
and economical paint in the market.
Remember this Rubber Paint is composed
of pure White Lead, Zinc, Linseed Oil, and
India Rubber, with the best coloring pigments
that can be obtained, ground in a careful
manner, and mixed with the best oil, so that
it will give the most beautiful and durable
finish. We refer to the following parties
who have used it with success:

This was the only professional visit he
ever received from a doctor. Mr. B.

There was an attempt to break into
the safe at the G. T. R. depot at this
place Wednesday night. Entrance to
the depot was effected by crawling
through a variety of ways, but they
lost the ticket office window. The han-
dle to the safe was considerably battered
in attempting to tear it off. The
burglars were probably frightened
by the guard, and they got away.
Nothing in the office was taken as far
as Mr. Waters is able to discover.

Should any of our readers be looking
for a good school to attend, we would
advise them to investigate the educa-

New England. It is largely attended
by students from this state, as the cat-

copy of the catalogue at this school, then at
your monthly boarding school. Send for

Uncle Joel Frost and says it is 67 years
last May since he has been sick a single
day. When Mr. Bennett was ten years
old he had the enteric fever, and old Dr.
Dodge was called to visit him.
This was the only professional visit he
ever received from a doctor. Mr. B.
says "since that to the present day, I
have been out of the house every day." The
most severe accident that fell to Mr.
B. was some over a year ago, when a
cat bit the fore finger of his right hand
—and resulted in a bad sore and finally a
stiff joint in the finger.

The Cook's Dilemma.
"Two teaspoons of cream of tartar
and one of soda to a quart of flour" was
formerly the standing direction in ev-
ery kitchen for making light biscuit,
cake, etc. It has been found of late
that the old rule won't work, double
quantity of cream of tartar being
frequently required to produce the
former result, and even then, owing to
the great variation in strength of the
cream of tartar, what can be put on
the shelves at the stores, uniform results
can no longer be depended upon in its
use.
The cause of the inferiority of mod-
ern cream of tartar is explained by
the fact that the Board of Health,
and also by the New York State Board
of Health, which in a recent examina-
tion of 27 samples of cream of tartar,
claimed by dealers to be of the best
quality, found them adulterated with
alum, terra alba, phosphate of calcium,
etc., from 3 to 98 per cent. Five sam-
ples were adulterated with terra alba
to such extent that they were really
tarts with a little cream of tartar
added. In the soda examination from
17 per cent. of carbonate of lime to 25
per cent. of ground gypsum were found.
Of course it is impossible to produce
light or wholesome bread with such
stuff as this for leavening material, and
the best cooks, if relying upon its use,
must frequently fail in their work. The
old formula, therefore, no longer to be
relied upon, must give way to new
methods.
